Projects

Personal Portfolio

Developed and designed a personal portfolio website to showcase my skills, projects, and accomplishments in a visually appealing and user-friendly manner.

<https://vidya-yadav-r.github.io/my-portfolio/>

Translator

Proficient in translating content between languages, with a keen understanding of cultural nuances and idiomatic expressions, ensuring accurate and natural-sounding translations.

[Language Translator \(vidya-yadav-r.github.io\)](#)

Basic Text Editor

Proficient in word processing software like Microsoft Word, it excels in creating, formatting, and editing documents for diverse purposes. Its skills include document formatting, text styling, document templates, and effective use of features such as track changes and version control

[Text Editor \(vidya-yadav-r.github.io\)](#)

Music Streaming Application

An application that allows the user to stream and listen to music

[V Music \(vidya-yadav-r.github.io\)](#)

Walking Robot

It is a graphical visualization of a walking robot designed using the C++ programming language. The OpenGL software was used. It follows the movements of the pointer key.

Women’s Safety Application

Created an Android application that can instantly alert guardians along with user location. Furthermore , It can be triggered by agitating the Android device in which the app is installed. The application was created using Java and Android Studio software.

E-Commerce System

A basic database management system was created using the SQL programming language in the Oracle software. A responsive website was also created where the user was able to add items to their cart and even add them to their wishlist.

Professional Experience

CodeClause

Internship

Web Development Intern
